## ABSTRACT

The uniting DNA with RNA from male and female forms a new baby borning seed. while viral affection reduces person sex power. vishuddha chakra is healing activated properly then no problem is occurred for respiration. Way to If unblock throat chakra . sound meditation also works Seed / beeja mantra is ham. It Supply of oxygen also solution In any longitudinal and latitudinal degrees it covers complete path affects whole network .Spreading was at neck portion Off course it was a biological weapon a body which has negatively charged particles or atoms which has just touching human body of some part of it .It has one of the biological nuclear which affects human cg part nucleus level. How many sense are there those level of sex also there Spreading ie, also based on sex level network. The method was used for spreading waves is body penetration usually by venus planetic energy clothes means of viral atoms touching to persons.it is easy for spreading virus if a person has contacts in sense level sex.its very difficult for spreading zero sense level sex for person sex history.

**Keywords:** Throat Affecting(Neck Portion), Chain Loop Spreading Single Sense Sex , Nuclear Level Seed Splitting, Barrier And Penetration To Viral

## I. INTRODUCTION

The complete human life is different from all over the lives of all living things. So all for birth and rebirth process living things will depend on sex for creation. Here how many senses present those types of sex will arise for that particular lives. All lives from 360 degree 360 networks from universal level. its very difficult to spread until and unless that particular network has sense level sex. The spreading viral collected girl all over the entire world is not a silly

talk. One thing we can conclude if she spreading is over then she became viral atoms were loosing and gaining protonic positively charged energy level. The perfect barrier is covered with body then no such viral affecting antibody of that particular spreading collected atoms reducing agents to Penetration to body power the antibody is nothing but enemy of that particular viral atoms holding spreading body Controlling surrounding environment of spreading viral atoms Strong layer of barrier plays vital role.

## II. BARRIER TO VIRUS

The wall for viral is antibody of that particular spreading collected atoms girl. What she actually had. Barrier controls and stops further spreading virus. The strong layer formation for protection level is widely applicable to all kinds of viral.so the protective layer includes antiviral usually gaseous form in atmosphere which is applicable to all types of viral spreading. Which element took major role it depends on affecting viral.

## III. PENETRATION TO VIRUS

The penetration causes for rapid pandemic growth of viral attack and spreading all over network. It is the weak layer which invites the viral atoms so the main intention is to not to spread the viral through body usually it may be skin . if skin permits viral positive to patient suffering.if not penetrates viral then patient gets negative to viral infection

## IV. CONCLUSION

1. The perfect barrier is covered with body then no such viral affecting
2. antibody of that particular spreading collected atoms
3. reducing agents to Penetration to body power
4. the antibody is nothing but enemy of that particular viral atoms holding spreading body
5. Controlling surrounding environment of spreading viral atoms
6. Strong layer of barrier plays vital role
